Overview:

- Background
- Objectives
- Challenges
- Question
Wireless Sensor Network
Objectives

• Familiar with wireless sensor networks

• Understand the data-processing, data collection and data-delivery in WSN

• Master basic techniques and experiment skills in WSN
Challenges

- Define the problem of query evaluation on WSNs under severe resource constraints.
- Examine popular queries and conducting experiments through simulations.
- Design a set of algorithms for query evaluations and maintenance.
Thank you
