Exploring the Use of SCRUM for Administrative Practice Improvement

Maha Ziade
Supervisors: Dr. Shayne Flint & Dr. Ramesh Sankaranarayana
What is SCRUM?

- Agile software development practice that focuses on maximizing team’s ability to react quickly and respond appropriately to change.
Why SCRUM?

- Widely used in SE due to its simplicity and flexibility
- Is focused on people rather than processes (traditional approach)
- Emphasizes on:
  - Communication
  - Collaboration
  - Teamwork
  - Rapid exchange of information
  - Flexibility to adapt to emerging business demands/requirements
Aim?

- Explore possibility of:
  - Adapting SCRUM to administrative environments to improve their practices (e.g. productivity)
  - Importing best practices of administrative environments to software development
Potential Case Studies

Planning to:

- discuss this project with people working on performance management at ANU
- get final approval from SACM
Thank you!
