Research Plan

My research plan for the one semester project is as follow:

WEEK5: Writing background of thesis and try to figure out an approach to convert genotype to phenotype.

WEEK6-Week7: Coding the main part, crossover, of the GA algorithm.

Mid-break: Read more references for my project and try to improve the performance of the code.

WEEK9: Release mvp of my project and doing some internal testing.

WEEK10: Finishing the main part of my thesis and do some external testing of the performance of the image-Generator.

WEEK11-12: Adding the test result part into my thesis and preparing for the presentation.
